Footnote Description

Operating temperature: 25 °C (77 °F), altitude: 700 m (22 ft 12 in), ICE627087: 2008 Broadcast Content, Image Mode: Dynamic, Dynamic Contrast Mode: 3.

When Standby Mode is set to Eco, network functions such as power on over LAN will not operate. Additionally, only certain commands can be received for external control using the serial terminal.

Refresh rate varies depending on scanning frequency.

At this time the brightness will have decreased to approximately half of its original level. Operating Temperature: 35 °C (95 °F), Altitude 700 m (22 ft 12 in), Dust: 0.15 mg/m3.

Measurement, measuring conditions, and method of notation all comply with ISO 21118 international standards.

Input signals that exceed the native resolution will be converted to the native resolution.

Optical axis shift function cannot be operated when used with the ET-D75LE50.

Range varies depending on mounted lens.

Average value. May differ depending on the actual unit.

When operational mode is set to Normal, operating temperature is from 0 °C (32 °F) to 50 °C (122 °F), and operating temperature is from 0 °C (32 °F) to 45 °C, (113 °F) when used in locations from 1,400 m to 4,200 m (4,593 ft to 13,780 ft) above sea level. When operational mode is set to Eco or Long Life 1/2/3, operating temperature is from 0 °C (32 °F) to 45 °C (113 °F). When used with Smoke Cut Filter, operating temperature is from 0 °C (32 °F) to 40 °C (104 °F). Projector cannot be used in locations over 2,700 m (8,858 ft) with operational mode set to Eco or Long Life 1/2/3. When used with Smoke Cut Filter, the projector cannot be used in locations over 1,400 m (4,593 ft). Light source brightness may decrease depending on operating temperature. When projector is operating at high temperature, brightness will decrease correspondingly.
