Footnote Description

1. Measurement, measuring conditions, and method of notation all comply with ISO/IEC 21118: 2012 international standards. Value is average of all products when shipped.
2. Average light-output value of all shipped products measured at center of screen in NORMAL Mode.
3. Around this time, light output will have decreased by approximately 50 %. IEC62087: 2008 Broadcast contents, NORMAL Mode, [Dynamic Contrast] set to [3], under conditions with 35 °C (95 °F), 700 m (2,297 ft) above sea level, and 0.15 mg/m³ of particulate matter. Estimated time until light output declines to 50 % varies depending on environment.
4. Lens shift is not supported on the ET-DLE055, and the optical axis is fixed with the ET-DLE035.
5. 4K input signals are resized to 2715 x 1697 pixels upon projection. (With Smooth Pixel Drive: ON)
6. With legs at shortest position.
7. Average value. May differ depending on the actual unit.
8. When using the projector at an altitude lower than 2,700 m (8,858 ft) above sea level, and the operating environment temperature becomes 30 °C (86 °F) or higher, the light output may be reduced to protect the projector. When using the projector at an altitude between 2,700 m (8,858 ft) and 4,200 m (13,780 ft), and the operating environment temperature becomes 25 °C (77 °F) or higher, the light output may be reduced to protect the projector.
9. When optional AJ-WM50 wireless module is attached, operating temperature range becomes 0-40 °C (32-104 °F).
