

AVCHD Codec Playback Board

AJ-YCX500G

The AVCHD Codec Playback Board for AJ-PD500 from Panasonic is an upgrade board that allows the AJ-PD500 P2/microP2 deck to playback AVCHD video files. Adding AVCHD playback makes it easier to incorporate footage from prosumer cameras into a broadcast workflow, allowing a single deck to accommodate many different camera types.

Key Features

Adds AVCHD Playback to AJ-PD500

Use One Deck for Many Cameras

Easy to install
