Advanced video analysis technology detects objects (faces, people, cars, motorcycles) in a specified area. (Intruder Detection, Loitering Detection, Direction Detection, Cross Line Detection)
AI Privacy Guard
To protect privacy and portrait rights, it is possible to automatically apply a mosaic the entire face and figure of a person photographed by the camera.
AI Face Detection
Detects faces with high precision even in low-light, backlit, and mask-wearing environments.
AI People Detection
Extract the characteristics of human face / clothing and classify them into meaningful categories such as gender, age, and clothing color.
AI Vehicle Detection
Extract vehicle characteristics and classify them into meaningful categories such as type and color.
AI Non mask Detection
Deep-learning and proprietary image processing technologies recognize mask and detect people who are not wearing them.
AI Occupancy Detection
Detecting the congestion via network camera with AI engine enables that information to be used direct visitors in advance or help store staff work more efficiently.
