

The NPM-WX, the latest generation of the NPM platform, is the perfect solution for the expanding and digital future in electronics assembly.

NPM-WX

The NPM-WX represents the next generation of Panasonic's mounting production concept "Smart manufacturing". The platform represents higher line throughput and improved quality at lower cost thanks to integrated automated systems. APC system and automatic recovery are integrated to provide autonomous line control. The incorporated floor-management system and remote-operation option improve utilisation combined with lower labour costs. Feeder set-up and component supply navigation systems are available, helping to reduce the work variations. The NPM-WX can handle a wide variety of components, from 0402 chip components up to large components with a max. size of 150x25x40 mm. Parts can be supplied from tape, stick or tray-feeder. Feeder-cart flexibility can be provided by selecting the existing 30-input feeder cart or inserting two 17-input

Key Features

86000 cph with up to 136 feed reels

Ready for line automatization

Automatic recovery options

Lowest cost of ownership (TCO) with maintenance services

Advanced feeder setup and component supply navigation
