## HD System Camera Channel

## AK-HC5000

HD system camera channel for live OB and studio production, concert and live event capture

## Key Features

HD system camera channel equipped with a newly-developed 3MOS sensor

The combination of larger pixels and optical expansion makes efficient use of incident light to achieve high sensitivity (F12@50p) and low noise (S/N 60dB)

High-speed scanning from the MOS sensor supports features including focus assist, flash-band compensation and skew reduction

Built-in optical conversion lens allows standard 2/3-type B4 mount lenses to be used

IP streaming and IP control is supported
